Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application, by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration has reviewed and understands the contents of the specification, including the claims, as amended by any amendment specifically referred to in the oath or declaration.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipate by Ranger et al., U.S. Pat. No. 6,393,568, hereinafter '568.

Art Unit: 2134

4. As per claims 1-8, '568 teaches an encryption and decryption system and method with content analysis comprising: monitoring/content inspection engine cryptographically protected data, a client, a server, a monitor, exchanging information, analyzing the decoded cryptographically protected data, determining if suspect, and preventing use if suspect, a common set of ciphersuite key, subset of keys, control over issuing keys to the monitor, storing suspect data, analyzing for viruses, (abs., figs. 1-4, col. 2, lines 25-45 et seq., col. 3, lines 1-50 et seq., col. 3, lines 35-40, col. 4, lines 21-31, col. 4, lines 1-15 et seq., col. 5, lines 1-20 and 40-65, col. 7, lines 10 et seq.).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over '568 as applied to claims 1-8 and further in view of the examiner taking official notice, being supported by Birrell et al, U.S. Pat. No. 5,805,803, hereinafter '803.

7. As per claims 9-20, '568 teach the claimed invention/system, not explicitly taught is the use of an SSL in a private network. '803 teach a secure tunnel being established between a client and a firewall/perimeter protection unit, which utilizes an SSL connection. It would have been obvious to one of ordinary skill in the art at the time of the invention to utilize and the invention of '568 in a secure web tunnel as taught by

'803. One of ordinary skill in the art would have been motivated to make such a modification, because, '568 teaches that his invention may be utilized as a perimeter protection device/firewall (fig. 4). '803 utilize a SSL connection though a firewall, to ensure a secure connection for a client to gain access to a server. One of ordinary skill in the art would have realized that the data transferred between a client and a server could have a virus contained in it, and thus, it could potentially harm the system. Therefore, one desiring to protect their system would want a means of checking the data to ensure that it does not spread a virus/worm.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
